By : BioVoice Correspondent - January 8, 2019

Bengaluru: Digital health solutions, IoT devices, mobility, big data, cognitive & predictive analytics, imaging intelligence, and cloud are impacting healthcare sector in a big way and there is a gradual rise in the adoption of these new technologies and innovation. According to a statistical report, the Healthcare Information Technology (IT) market which is valued at \$ 1 billion currently is expected to grow 1.5 times by 2020.

The above mentioned key technologies are influencing the healthcare sector and CIO's playing a pivotal role are evaluating some of these new technologies to enable their healthcare organizations gain operational efficiencies and improve business functions.

After three successful HIT conferences being executed in India, The Healthcare Innovation CIO Meet on 18th January 2019 in Bengaluru is a niche and industry specific conference, designed to bring together industry experts and thought leaders to address and discuss the rapidly changing healthcare IT roadmap from an Indian context.

Request for Agenda [HERE](#) to know what's new in 2019 event schedule.

Highlights of the Meet:

- Exclusive invitation only event for the decision makers
- Interactive format to ensure meaningful discussions between the solution providers and seekers
- Pre-scheduled one to one meetings on mutual agreement
- Limited to 30 CIO's who are qualified and profiled based on their requirements and challenges
